

Sarthak Gaurkhede

Software Engineer | Backend Developer

Building intelligent, scalable systems for automation and insight

[✉gaurkhedesarthak@gmail.com](mailto:gaurkhedesarthak@gmail.com) [☎+91 7414912141](tel:+917414912141) [📍Nagpur](#)

SUMMARY :- Application Developer experienced in building and optimizing enterprise-level applications using **Python, SQL, React.js, and cloud technologies**. Skilled in debugging, system enhancement, and delivering scalable solutions.

SKILLS

Programming Languages: Python, SQL, React.js
DevOps & Tools: Google Cloud Platform, cloud computing
Cloud/DevOps: Git, GitHub Actions, Google Cloud Platform
Data & Analytics: Power BI, Python + SQL automation

EDUCATION

B.Tech, Artificial Intelligence and Machine Learning Datta Meghe Institute of Higher Education & Research University, Sawangi	CGPA: 7.21	2021 – 05/2025
Class 12, State Board , Bajaj College of Science, Wardha	Aggregate: 87.14 %	2020 – 2021

PROFESSIONAL EXPERIENCE

- Full Stack Developer Intern | Sancy Berhad**(May 2024 – Oct 2024)
 - Designed and developed **enterprise-grade application modules** using React.js, improving frontend throughput and real-time system performance.
 - Debugged critical application issues using logging frameworks and systematic root-cause analysis, improving system stability by 30%.
 - Implemented **code testing workflows** using automated CI/CD pipelines in GitHub Actions, ensuring reliable deployments. Collaborated with backend/infra teams to build maintainable, modular APIs aligned with business process requirements.
- Python Intern | Arohi Software Development**(Nov 2024 – Mar 2025)
 - Developed Python- and SQL-driven data automation pipelines integrated into enterprise applications, reducing manual workload by 40%.
 - Built Power BI dashboards with Python + SQL workflows to enhance enterprise reporting systems and decision-making.
 - Performed debugging, validation, and functional testing of data workflows to ensure system reliability.

PROJECTS

- Oral Cancer Detection Using Deep Learning & IoT**(Nov 2024 – Mar 2025)
 - Built a Flask-based API for real-time image processing from IoT-enabled Raspberry Pi devices.
 - Integrated **VGG16**-based classification pipeline; implemented logging/debugging for model inference reliability.
- AI - Powered Chatbot for Customer Support**(May 2024 – Oct 2024)
 - Developed multilingual chatbot using BERT, Dialogflow, and SpeechRecognition handling 200+ queries/day.
 - Implemented backend monitoring & debugging system using Flask logs to ensure consistent response accuracy.
- Telecom Customer Churn Analysis**(Sep 2023 – Nov 2023)
 - Built churn prediction system (85%+ accuracy) using ML with GridSearchCV.
 - Rewritten Impact:** Developed enterprise-grade dashboards by integrating Python, SQL, and Power BI to automate data workflows and support business retention strategies.

POSITIONS & ACHIEVEMENTS

Google DSC Technical Lead, Google for Developer: Trained over **600** students in Google technologies through workshops and bootcamps, achieving Tier 1 status globally in both the **Google Cloud Campaign and Gen AI Bootcamp**.

IEEE Student committee Joint Secretary, IEEE Bombay: Lead various national-level events involving **300+ students**, driving engagement and innovation in the IEEE Bombay Section through diverse activities and initiatives.

Winner’s at MEDICO-ENGINO HACKATHON by MIT-WPU, Pune

PUBLICATIONS

- Published **2 Research** papers in top-tier indexed journals (IEEE), contributing to advancements in Machine Learning, Secure AI Systems, and Healthcare Intelligence.

CERTIFICATES

IBM Data Analyst Professional Certificate — Coursera (4 months)
Databases & SQL for Data Science — Coursera (2 months)
Google Cloud Career Readiness Associate Cloud Engineer Track(4 months)
Introduction to Data Science — IBM (1 month)
